

Hi Isaac,

I am writing to confirm that I am partnering with you on the development of my business website we've talked about before for your course project. I want the website to be named T's Travel and help individuals, couples, families, and retirees plan vacations such as cruises, all-inclusive resorts, and custom travel experiences. I understand that you will be acting as my web developer and designing and building a website that represents my travel business. I approve your role in this project and look forward to working with you throughout your semester.

Please let me know if you need anything further from me.

Best regards,

Tammy Craft
